

## Press Release

# HOCHTIEF subsidiary to build hyperscale data center for Meta in the US

### **USD 800 million project reinforces Turner's leading position in fast-growing data center market**

HOCHTIEF continues to expand its strong position in the digital infrastructure market. The Group's US subsidiary Turner has been awarded the contract to manage the construction of a hyperscale data center campus for Meta in Jeffersonville, Indiana. This 6,500 square meter campus will include several data center buildings and will be part of Meta's global technology infrastructure. The data center will represent an investment of more than USD 800 million.

The data center will be built with a focus on efficiency, flexibility and sustainability. Turner will use prefabricated modular assemblies and equipment. Once operational, the Jeffersonville Data Center will be fully powered by renewable energy through investments in new renewable energy projects and, like Meta's other data centers, will be LEED Gold certified by the U.S. Green Building Council. At the peak of the project, more than 1,250 construction workers will be on the job every day. Construction will begin this month.

The digital infrastructure market is an enormous growth opportunity for the whole HOCHTIEF Group: In the first nine months of 2023 Turner has won several large data center projects worth a total of almost EUR 2 billion. In Germany, HOCHTIEF is executing a contract to build and operate a sustainable data center in Heiligenhaus (North Rhine-Westphalia). HOCHTIEF is also building a data center in the Polish capital Warsaw. And in Australia, HOCHTIEF subsidiary CIMIC has been awarded contracts for the construction of data centers in Hong Kong, the Philippines and Malaysia during 2023.

**HOCHTIEF** is an engineering-led global infrastructure group with leading positions across its core activities of construction, services and concessions/public-private partnerships (PPP) focused on Australia, North America and Europe. With around 37,000 employees and a sales volume of more than EUR 26 billion in 2022, HOCHTIEF's global presence is focused on developed markets. Via CIMIC, the Group is market leader in Australia. In the USA, HOCHTIEF is the No. 1 general builder via Turner. Flatiron ranks among the most important players in the field of civil works, mainly in transportation infrastructure. HOCHTIEF owns a 20% stake in Abertis, the leading international toll road operator. Thanks to its commitment to sustainability, HOCHTIEF has been listed in the Dow Jones Sustainability Indexes since 2006. Further information is available at <https://www.hochtief.com/news-media>
