Flatiron Named Apparent Low Bidder on San Bernardino County Rail Project

Broomfield, Colorado (February 20, 2019) – Flatiron Construction Corp., one of the largest infrastructure contractors in North America, has been named apparent low bidder on the Redlands Passenger Rail project in San Bernardino County, California. The nine-mile new rail construction, valued at more than \$154M, is a progressive regional transportation project that will extend passenger rail service for nine miles from downtown San Bernardino to near the campus of the University of Redlands.

Construction is anticipated to begin in the spring of 2019 and continue through late 2021. Active freight rail service on existing track will be maintained during construction and materials will be recycled as much as possible. Learn more at [Redlands Passenger Rail Project](#).

About Flatiron Construction Corp.

Flatiron develops innovative solutions to build transportation and infrastructure projects across the U.S. and Canada, including roads, bridges, highways, rail transit, airports, dams, and water treatment and storage facilities for both public and private clients. Flatiron delivers projects through a variety of alternative delivery methods, including design-build, construction manager/general contractor, and public-private partnerships in addition to bid-build.
