

Press Release

HOCHTIEF listed in Dow Jones Sustainability Index for the 16th year in a row

Inclusion recognizes HOCHTIEF's focus on sustainability

HOCHTIEF has been included in the internationally renowned Dow Jones Sustainability Index (DJSI) for the 16th time in a row for its economic, environmental and social performance. The company is thus one of only three infrastructure groups listed in the DJSI World Index. The DJSI World ranks among the highest-profile indices for sustainability. Measured in terms of their sustainability performance, the index includes the top ten percent of companies in their respective sectors, based on the S&P Global Broad Market Index.

Alongside integrity, accountability, innovation and delivery, sustainability is one of the Group's guiding principles.

HOCHTIEF aims to further enhance its leadership position in relation to ESG (Environmental, Social and Governance). To this end, all business units are working on the 2021 to 2025 sustainability plan, which will be finalized in the near future. The new framework comprises carbon reduction targets in order to support the goals of the Paris Agreement on climate change.

HOCHTIEF is an engineering-led global infrastructure group with leading positions across its core activities of construction, services and concessions/public-private partnerships (PPP) focused on Australia, North America and Europe. With around 47,000 employees and a sales volume of about EUR 24 billion in 2020, HOCHTIEF's global presence is focused on developed markets. Via CIMIC, the Group is market leader in Australia. In the USA, HOCHTIEF is the No. 1 general builder via Turner. Flatiron ranks among the most important players in the field of civil works, mainly in transportation infrastructure. HOCHTIEF owns a 20% stake in Abertis, the leading international toll road operator. Thanks to its commitment to sustainability, HOCHTIEF has been listed in the Dow Jones Sustainability Indexes since 2006. Further information is available at www.hochtief.com/press.
